

1/1 **Declaration of compatibility UNO-DM-PLUS – TIGO**

Declaration of compatibility between UNO-DM-PLUS product families and Tigo TS4 Module platform

We hereby confirm that FIMER's UNO-DM-PLUS product families (both IEC and UL versions) can be operated in combination with Tigo's TS4-F/O/S/M and TS4-A-F/2F/O/S/M products provided the following is observed and noted:

1/1

- FIMER solar inverters are operated in accordance with reference conditions as specified within the respective product manuals and datasheets.
- The operating limits (DC voltages, currents and power) of FIMER solar inverters are never exceeded as a result of Tigo products' operation.
- FIMER does not bear any responsibility over the compliance of the complete system in terms of EMC regulation.
- FIMER does not bear any responsibility over variations of the total energy yield of the PV system due to the installation of Tigo devices.
- FIMER does not bear any responsibility over malfunctioning of Tigo Energy's products/system configuration.

Under these conditions, FIMER's manufacturer warranty obligations for UNO-DM-PLUS (all versions) inverters operating with Tigo's TS4-F/O/S/M and TS4-A-F/2F/O/S/M will hold.
