

Aurora Vision Energy Viewer

Energy Viewer allows solar power plant owners to remotely monitor the main power generation indicators as well as all the energy flows and the energy-consumption of their own PV plants, with or without an energy storage system installed, "At-a-Glance".

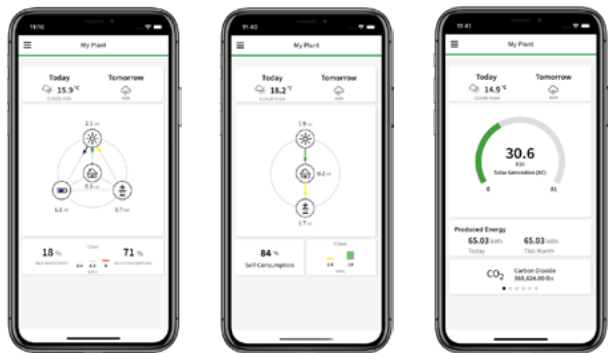

Energy Viewer allows you to perform energy management from anywhere you want, thanks to easy-to-use and easy-to-view dashboards, for a portfolio of residential to commercial scale power-plants:

- Visualize all the energy flows that enters and exits the main subjects involved in the solar power plant ecosystem, thanks to a 360° synoptic view with DCDS (Dynamic Configuration-Driven Shaping) feature; *
- Manage your energy thanks to an Energy Monitoring Card that includes Self-Consumption & Self-Sufficiency KPIs; *
- Track the main Power Generation KPIs;
- Control active and closed events of your PV plant, thanks to a dedicated dashboard and the synoptic DEDES (Dynamic Events-Driven Shaping) feature; *
- Update your firmware remotely;

A Free Comprehensive Solution

Energy Viewer is integrated with all FIMER inverters, with or without an energy storage system installed, and is available for free for all plants using FIMER inverters.

All dashboards are scalable, offering different views for all needs.

* feature available only with a supported bi-directional meter installed

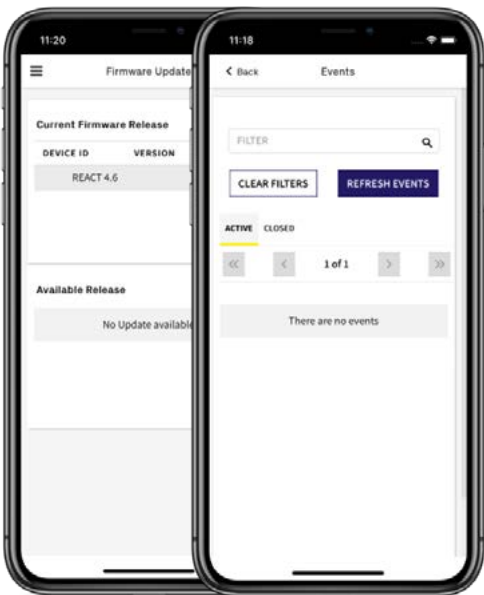

For all your favorite devices

Energy Viewer App is downloadable from App Store, Google Play Store and it is compatible with iOS (11.0 or better) and Android (7.0 -Nougat - or better).

Comprehensive Energy Management

Analyze all the details you want, for every subject involved in your solar power plant ecosystem. Watch your consumption rise and fall, including historical usage.

Events & Remote Firmware Update

Analyze and evaluate the status of your PV plant thanks to a dedicated dashboard mapping errors at devices level. Check for available firmware updates and start them remotely, everywhere you are.
