

Commissioning service Professional startup for your central inverter

Optimize availability and performance of a new inverter with professional commissioning:

- PVS980-58 5MVA
- PVS980-58 2MVA
- PVS980-58BC
- PVS800-57B

Ensured safety

The commissioning must be performed by a commissioning expert certified by FIMER following local safety regulations.

Cost awareness

An agreed scope of the commissioning will ensure efficient operation, energy savings and best value for money.

Operational reliability

A commissioning expert certified by FIMER will perform the commissioning using the latest tools and instructions. Parameter adjustments based on local grid will ensure reliability.

Inverter documentation

Commissioning and installation information are recorded in the commissioning report. They are available later for maintenance support.

Central inverter commissioning at your site

An expert certified by FIMER carries out the commissioning tasks according to the manufacturer's instructions and local safety regulations. The inverter is commissioned to optimize the performance of your solar plant.

User guidance

During the commissioning work, the expert certified by FIMER can guide your personnel on the basic central inverter usage. More extensive operations and maintenance training is available separately.

Central inverter documentation

Your commissioning information is recorded for later maintenance actions.

FIMER commissioning report

FIMER delivers you the commissioning report, including backup files and safety documentation.
