

Monitoring and communications Plant Viewer for Mobile

Plant Viewer for Mobile gives solar power plant owners a flexible and cost-effective solution for monitoring their solar power systems while “on-the-go”.

Plant Viewer for Mobile delivers an easy way to monitor, both locally and remotely, your home solar power system on an iOS/Android smart phone or tablet

With Plant Viewer for Mobile, homeowners can remotely monitor their solar power plants to track the energy produced in real time.

Customize, collaborate, and monitor energy production

Solar plant owner homeowners have the choice of self-registering their FIMER's inverter site to privately monitor their home energy production. As an alternative, homeowners can collaborate with installers to share energy generation data to jointly monitor their energy production.

Local Display

A key feature of Plant Viewer for Mobile is its capability to communicate wirelessly with the FIMER's VSN300 Wifi Logger Card and so to enable smartphone or tabled to act as local display of most TRIO, PVI and UNO inverters. FIMER's inverter owner not featuring embedded Wi-Fi connectivity and

integrated data logger are so enabled to monitor via mobile app the performance and the status of its solar inverters without the need of using Internet at all.

Highlights

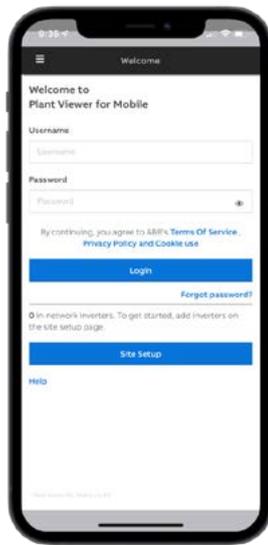

- Real-time energy production monitoring including, hourly and daily tracking history
- Track energy production in multiple plant locations
- View historical energy production information in excel format
- Track temperature, wind and irradiance information using add-on options sold with your solar power system
- Compatible with the latest iOS and Android devices
- Act as wireless local display for inverter with VSN300 installed in (no Internet connection needed)

Plant Viewer for Mobile is also available as desktop version, named Plant Viewer: an easy to use web portal enabling remote monitoring of the performance and the status of any residential and commercial FIMER solar plant

Accessing Plant Viewer for Mobile is as easy as 1-2-3:

1
Install Plant Viewer for Mobile App from the Apple Store (for Apple devices) or the Google Play™ (for Android devices)

2
Log in to your newly installed application using your Aurora Vision user account and password.

3
View your solar system's energy production on a smart phone or tablet of your choice.

Google Play™ is a trademark of Google Inc. App Store is a service mark of Apple Inc.
