

Press Release

AUSTRALIA, MELBOURNE, OCTOBER 26, 2022

TOP TIER ELECTRIC VEHICLE CHARGING MANAGEMENT PROVIDER, EVERY PARTNERS WITH FIMER TO OFFER MORE TO THE AUSTRALIAN MARKET

FIMER and **Every** announced an exciting new partnership at the 2022 All-Energy Conference and Exhibition in Melbourne, Australia. The partnership will see FIMER's complete range of EV charging solutions available with Every's top-tier EV charging management software to deliver significant value-adds to Electric Vehicle users and operators in the industry.

The new partnership will allow FIMER EV Charger customers to access Every's hardware and software bundle for a three months free trial within the Australian market.

The Every-equipped charging stations will allow private, public and commercial users to benefit from real-time information on charging status, access diagnostic data, and identify and take advantage of off-peak and on-peak periods to maximize cost savings.

Manufactured in Italy, FIMER's complete electric vehicle charging infrastructure portfolio is suitable for private, public and commercial use. The Every platform is compatible with **FIMER FLEXA AC FutureNet Wallbox (7.4 and 22kW)**, the **FIMER FLEXA AC Station (22kW)** and the **FIMER ELECTRA DC Station (fast charging up to 150kW)**.

Accessible via mobile phone app and desktop computer, the Every software as a service or SaaS product is designed to seamlessly meld with FIMER's extensive range of charging solutions and is easy to get up and running with minimal input.

For residential consumers, Every's user-friendly features allow them to schedule charging, control power output, access charging session records, increase solar self-consumption and more.

Empowered by Evertly's software, commercial enterprises can monetise and monitor FIMER's EV charging performance and optimise day/night charging according to on and off-peak periods. Like residential users, businesses can tap into renewable energy sources like solar from their onsite systems.

Another key feature of the software is Evertly's revenue-earning billing feature and its capacity to integrate with 3rd party systems. The business-friendly platform is further enabled by a powerful interface that makes remote monitoring and diagnostics a breeze. Commercial enterprises can easily and efficiently manage an entire charging network with minimal operational expenditure thanks to the smart monitoring and diagnostics that help increase uptime and reduce operation and maintenance costs.

Evertly Founder and CEO Carola Jonas says: *"Evertly is pleased to partner with FIMER to deliver the latest EV software management technology to market. As EVs grow in popularity, many residential, commercial, and public users are grasping the strong cost savings and environmental benefits of EVs. Evertly's platform helps entities realise the commercial benefits of EVs and empowers them to make the switch."*

FIMER Australia's Country Manager, Jason Venning says: *"FIMER's partnership with Evertly is a great step forward in Australia. It will allow FIMER to offer customers a quality AC & DC charging solution integrated with a comprehensive charging management solution."*

He continued, *"Evertly's platform opens up new commercial possibilities for businesses, and we are excited to offer the introductory trial to our customers so they can see the power of the Evertly platform."*

About Evertly

Evertly is a technology (software) company in the e-mobility sector and provides EV charging solutions and a cloud-based Software as a Service (SaaS) platform to companies installing Electric Vehicle (EV) charging infrastructure.

The software allows EV charging station operators to monitor, manage and monetise their charging infrastructure assets and provides an interface to EV drivers for the use of chargers. Evertly's software enables efficient management and operation of physical assets (EV charging stations) as well as the integration of cars and charging infrastructure with the electricity grid.
