Factory Inspection Certificate

Registration No.: AK 60187997 0001

Page 5/5

Report No.: IT26BC87 001

Above stated products and types have been assessed during an inspection of the manufacturing plants. Main assembly and quality control of these models is performed at manufacturing plants located within the European Union. The following main production steps are taking place in the above listed plant:

- development
- assemblage
- measuring and testing

Remarks:

This certificate is valid from the expiry date of the previous one, until the next scheduled inspection or up to 12 months, at the discretion of TÜV Rheinland.

In detail, inspection of manufacturing process and used component's check have been performed in order to guarantee a constant quality level as used for type test for compliance to CEI 0-21, CEI 0-16, DIN-V-VDE 0126-1-1, EN 62109-1 and EN 62109-2 (where applicable) see detail in each product's test report.

⁽¹⁾ The other MA Solar Italy Srl.'s manufacturing locations are under a periodic factory surveillance programme which is documented in inspection report.

⁽²⁾ The report of the factory inspection includes the requirements of GSE applicative rules about the manufacturing quality process and used materials. In detail: visit has been performed to each factory and inspection of manufacturing process and components' check have been performed in order to guarantee a constant quality level as used for type test for compliance to CEI 0-21 for LV connection and CEI 0-16 (or annex A70) for MV/HV connection.

⁽³⁾ Factory Inspection has been based on a detailed description of inverter's manufacturing process and components supplied by Licence Holder to TÜV Rheinland Group (as permitted by Delibera AEEG n. 84/2012/R/EEL and GSE's documents related to 4th and 5th conto energia).
